Institut für Programmstruktutren und Datenorganisation

Vorgaben

Entwickeln einer Lernapplikation für Kinder:

- Zielgruppengerechte Bedienung
- Anhaltende Motivation
- Kontrolle des Lernfortschritts

Musskriterien:

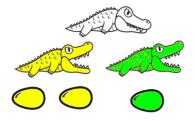

- \blacksquare Erstellung und Auswertung von λ -Termen in kindgerechter Form
- Interaktive Einführung und Erklärung der Regeln
- Bedienung über ein Tablet mit Toucheingabe

Spielprinzip

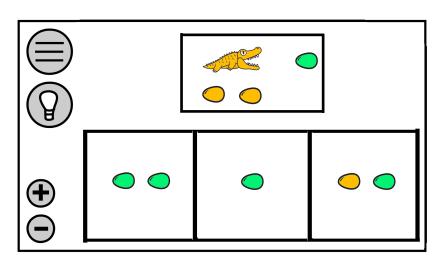

Spielidee von Bret Victor:

- lacktriangle Alligatoren repräsentieren die Abstraktionen im λ -Kalkül
- Eier stellen die Variablen des λ-Kalküls dar
- Alte Alligatoren dienen zur Darstellung der Klammern
- Familien bestehen aus Eiern, Alligatoren, alten Aligatoren und anderen Familien
- Beispiel: $((\lambda x.x x)(\lambda y.y))$
